

TLS-1 Hybrid review Mike Ginnasio 8-15-14

If you have never heard a Walsh style driver or Speaker system you do not know what you are not hearing or missing and I thought I had heard it all. I have been in Audio Engineering and Recording for a very long time.

The music I have been listening to in my studio for years over different speakers sounded just fine, But...

I decided to send Dale Harder of HHR Exotic Speakers a set of non-functional Walsh "F" speakers for re-manufacture. Not only was the workmanship and details flawless, but the 60+ improvements and the craftsmanship can only be compared to great artist's (Monet, Michelangelo, Van Gogh, etc.). The difference is little "High Hat" taps, the clarity of Vocals, etc. They reproduce realistic sound throughout the entire audio spectrum. When you close your eyes, it is like the vocalist is in the room with you.

Since my speakers were re-manufactured using just 3 parts from the old set, they are called "TLS-1 Hybrids", and they are amazing! I can only imagine if I purchased a pair of the New TLS-1's built from the ground up by Dale!!! Anyone who is an Audiophile "Nut" needs a pair.

I would like to say a few things about Dale and HHR Exotic Speakers:

This is unlike any other company you have ever dealt with before. Dale is always available by phone or e-mail. He will answer any question and converse with you. He responds within an hour or so, not days! During my speaker build there was constant contact through the whole process from start to finish. He not only cares about keeping this speaker technology alive, with great improvements, he truly cares about his clients and their satisfaction. I can go on and on. Bottom line, it's an amazing speaker built by an amazing person and company!!! Lincoln Walsh is up above smiling down at Dale!!

Dale Harder, HHR Exotic Speakers, Thanks for Everything!
